

Number 17-BA Nicopress Tool

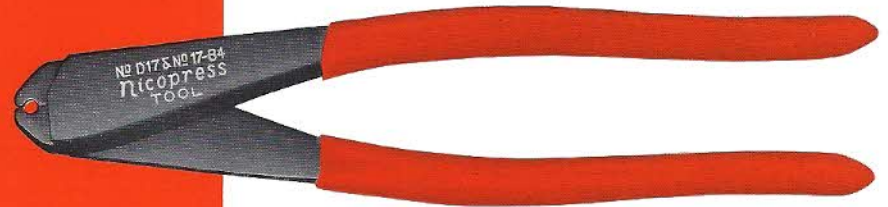

Tool Length 8 1/4"
 Shipping Weight 3/4 pounds
Important: Make 2 Presses Per Sleeve

1/32" oval sleeves and stop sleeves can be pressed with this tool. Light weight, low cost, this handy field tool can be used with small diameter steel aircraft cable. Use the 17-BA tool to press Nicopress Part Numbers 17-1-B and 27-1-B oval sleeves and the 871-32-B stop sleeve.

Number 17-B4 Nicopress Tool

Tool Length 8 1/4"
 Shipping Weight 3/4 pounds
Important: Make 3 Presses Per Sleeve

This tool used to press 3/4" oval sleeves onto steel aircraft cable. The 17-B4 tool will reach confined spaces which larger tools cannot. Use this tool to press Nicopress Part Numbers 18-11-B4, 28-11-B4 and 428-1.5-VB4 oval sleeves.

Number 33V-CGB4 Nicopress Tool

Tool Length 11 3/4"
 Shipping Weight 2 1/2 pounds

When several small diameter cables are being used, we recommend this multi-groove tool. The 33V-CGB4 has three pressing grooves which press oval sleeves 3/4" (B-4), 1/16" (C) and 3/32" (G).

Splices made with these tools typically hold military specification grade aircraft control cable in tension until the cable breaks. To insure good splices, make the proper number of presses in each sleeve. Applications that require continuous and frequent sleeve pressing call for the use of our larger toggle action tools, or power press equipment.

Nicopress® TOOLS

NO. 32-VC: VG TOOL

Tool Length11-1/2"
Shipping Weight ..2-1/2 pounds

A small hand tool with two sleeve-pressing grooves in the head. It is used for splicing with Nicopress Oval and Stop Sleeves having "C" or "G" letters in their Stock Numbers.

NO. 51 TOOLS

Tool Length18-1/4"
Shipping Weight ..5-1/4 pounds

Each tool has a single sleeve-pressing groove for the size of cable. Range accommodated — 3/64" through 7/32".

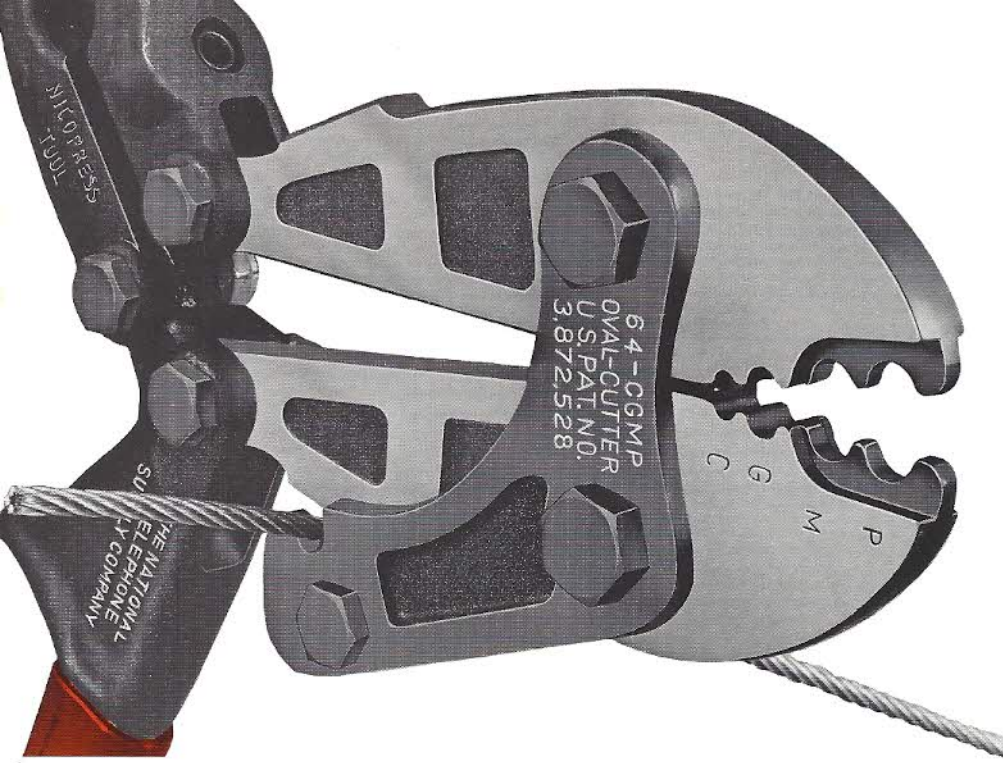

TYPES NOS. 63 AND 64 TOOLS

Tool Length20"
Shipping Weight6 pounds

These are multiple sleeve-pressing groove hand tools. The No. 63V-XPM has three grooves and is used only with Oval Sleeves. For cable sizes 1/8", 5/32" and 3/16".

The No. 64-CGMP has four grooves and is used for Oval Sleeves in the range of cable sizes from 1/16" through 5/32". The "C" groove is also used for the No. 871-1-C Stop Sleeve.

Nicopress Number 64-CGMP Cutter Tool with Cable Cutter *

The newest tool in the Nicopress line combines two important functions . . . cable cutting and oval sleeve pressing. The 64-CGMP/Cutter Tool eliminates the handling of two separate tools. Engineered for field conditions, this tool is made from drop-forged alloy steel; the working surfaces are heat treated and specially hardened. Toggle action provides high mechanical force and results in low cutting effort. Cutting blades can be reversed for long useful life. This versatile field and shop tool cuts mechanical cable sizes up thru 7/32".

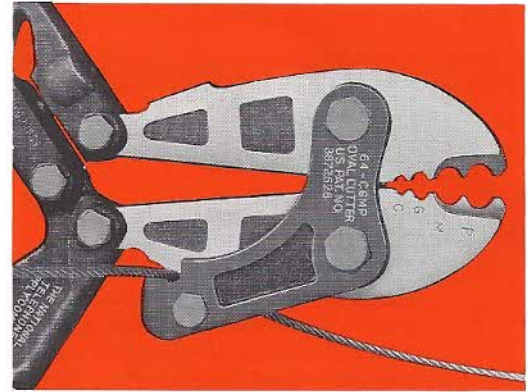

The 64-CGMP/Cutter Tool presses Nicopress Oval Sleeves 1/16" (C), 3/32" (G), 1/8" (M) and 5/32" (P). In addition the 1/16" stop sleeve can be pressed with the C groove.

This tool cuts mechanical steel cable as large as 7/32", the cutting surfaces surround and support the cable while it is being cut. There are no frayed cable ends and cable cuts are clean and round.

Tool Length20"
Actual Weight5½ pounds

Cuts Cable

Very low cutting effort is required to cut mechanical steel cable up thru 7/32". Hardened cutter blades surround and support the cable during the cutting action which results in round, clean-cut cable ends.

Eye Splices Cable

This single tool will cut and eye splice steel cable, eliminating the need for two separate tools. The 64-CGMP/Cutter Tool eye splices four cable sizes — 1/16", 3/32", 1/8" and 5/32".

Nicopress[®] TOOLS

NO. 51 TOOLS FOR STOP SLEEVES
